## **CLASS ACTION COMPLAINT**

Plaintiffs Meridian Treatment Services, iRecover Treatment Inc. d/b/a Serenity Palms Treatment Center, and Harmony Hollywood Treatment Center (“Plaintiffs”), complain on their own behalves and jointly, on behalf of all others similarly situated, against United Behavioral Health (“UBH”) (operating as OptumHealth Behavioral Solutions), and allege the following:

## INTRODUCTION

7       1. On March 5, 2019, Magistrate Judge Spero of this Court entered Findings of Fact  
8 and Conclusions of Law in *Wit, et al. v. United Behavioral Health*, No. 14-CV-02346-JCS  
9 (hereinafter “*Wit*”). In that decision, Judge Spero specifically found that, for many years, UBH  
10 denied claims using guidelines that were based on profit and cost saving rather than the actual  
11 clinical needs of its members who suffered from mental health and/or substance use disorders.  
12 This Court found that those coverage guidelines were inherently corrupted and violated both state  
13 and federal laws as well as generally accepted principles of behavioral healthcare. Plaintiffs  
14 incorporate the entirety of the *Wit* decision herein by reference.

15       2. Plaintiffs, and the class they seek to represent, are behavioral healthcare providers  
16 who treated patients with UBH insurance during the class period as defined in *Wit*, et al. through  
17 January 31, 2019<sup>1</sup>. Plaintiffs, and the class they seek to represent, have not been paid for years'  
18 worth of claims that were denied by UBH based on the now-discredited guidelines. In every case,  
19 Plaintiffs, in their professional judgment as licensed clinicians, determined that the services  
20 provided to their patients met generally accepted criteria and were medically necessary before  
21 UBH denied their claims. Following the recent *Wit* decision, all adverse behavioral health clinical  
22 determinations by UBH during the *Wit* class period, until the time UBH changed its guidelines  
23 after January 31, 2019, are now suspect. Therefore, Plaintiffs, and the class they seek to represent,  
24 ask this Court to enter a judgment requiring a neutral third-party overseen and appointed by the  
25 Court to re-process all denied claims from behavioral health providers that UBH denied based on

<sup>1</sup> On February 1, 2019, UBH switched from using its own guidelines to utilizing the guidelines of the American Society of Addiction Medicine (ASAM), presumably in expectation of this Court’s findings in *Wit.*

1 UBH's former, discredited clinical guidelines. This action also seeks punitive damages pursuant  
 2 to California law. The Plaintiffs and putative class did not discover that the denials were the result  
 3 of improper guidelines until the entry of this Court's decision in *Wit* on March 5, 2019. As is  
 4 industry practice, Plaintiffs and the putative class have assignment of benefits and financial  
 5 responsibility agreements with all patients that entitle them to direct payment of claims by UBH.

6       3.      The potential dollar amount of wrongfully denied payments owed to Plaintiffs and  
 7 the class is substantial. The three named Plaintiffs had 157 patients with over 2000 collective  
 8 claims denied by UBH pursuant to their discredited medical necessity guidelines during the  
 9 relevant period. In all cases, services were provided to UBH's members in good faith but were  
 10 denied under faulty guidelines and have never been paid. For the Named Plaintiffs' alone, denied  
 11 claims total over \$5 million.

12       4.      Plaintiffs estimate that the number of providers effected by the *Wit* decision,  
 13 including both individual providers and facilities, is in the tens of thousands and includes all  
 14 licensed behavioral healthcare providers in the United States who accepted patients with UBH  
 15 insurance during the *Wit* class period through January 31, 2019. Based on extrapolation of data  
 16 known to Plaintiffs, Plaintiffs believe class-wide damages may exceed \$8.3 billion dollars.

17       5.      Although the decision in *Wit* specifically addressed ERISA plans, UBH utilized  
 18 the same guidelines to assess claims from non-ERISA plans. The Court's findings and holdings  
 19 concerning UBH's guidelines do not depend on the plans being ERISA plans. Plaintiffs, and those  
 20 similarly situated, treated both ERISA and non-ERISA UBH plan members alike. Additionally,  
 21 UBH applied their flawed guidelines to coverage decisions based on medical necessity to both in-  
 22 network and out-of-network providers, equally. The same defective guidelines were used across  
 23 the entire spectrum of UBH plans and provider category.

24       6.      Because these categories comprise the entire universe of possible commercial  
 25 behavioral health insurance claims (ERISA, non-ERISA, in-network, out-of-network), ***all*** claims  
 26 denied by UBH under the discredited guidelines during the *Wit* class period, through January 31,  
 27 2019, must be reprocessed, at UBH's expense, under appropriate, industry-recognized and  
 28 accepted guidelines by a third-party neutral overseen by the Court, as UBH has demonstrated that

they cannot apply guidelines in a fair, impartial or clinically appropriate manner.

7. As further described below, the claim denials that Plaintiffs are seeking to have reprocessed involve both unreasonably delayed pre-service, pre-certification or prior-authorization level of care benefit denials during courses of treatment and also claims involving post-service denials where treatment had previously been authorized or otherwise permitted by UBH. In all instances relevant, the denied claims at issue were either fully appealed, the appeals were ignored, or further appeals would have been futile. Plaintiffs and the class they seek to represent, have no recourse other than the bringing of this action.

8. As shown in *Wit*, UBH has egregiously and consistently violated its independent legal duties to providers. UBH’s medical necessity and level of care determinations were shaped by a financial team and not by established, accepted clinical standards. As a result of UBH’s conduct, Plaintiffs’ continuing ability to provide treatment to behavioral health patients is in jeopardy. Faced with a past and present deluge of UBH members suffering from mental health disorders and addiction, and billions of dollars in illegally unreimbursed care, many providers across the country, most of whom are small and community-based, are on the verge of insolvency or bankruptcy. At the same time, in 2018, UBH’s parent company, UnitedHealth Group is reported profits of \$12 billion dollars on \$226 billion dollars in revenue for 2018<sup>2</sup>.

9. Profit, not patient care, drove medical necessity decision making at UBH. This action seeks to hold UBH for services provided to its members that were medically necessary but denied. Plaintiffs and class members cannot hold UBH accountable for services that were medically necessary but not provided through this action; however, that does not diminish or excuse UBH's decisions or in any way wash the blood from its hundreds of thousands of hands.

## **SUMMARY OF PLAINTIFFS ALLEGATIONS**

10. Plaintiffs Meridian Treatment Center (“Meridian”), iRecover Treatment Inc. d/b/a Serenity Palms Recovery (“Serenity”), Hollywood Harmony Treatment Center (“Harmony”), and the more than ten thousand similarly situated treatment centers across the United States (collectively “Plaintiffs and Plaintiff Class”) provide sub-acute mental health and substance use disorder services to commercially insured patients under both ERISA and non-ERISA plans both as in-network and out-of-network providers.

11. Defendant United Behavioral Health (“UBH” or “Defendant”) is responsible for making coverage and level of care determinations that UnitedHealth Group or its subsidiaries’ insureds receive. UBH makes MH/SUD coverage determinations regarding plans issued, administered, underwritten, and/or otherwise managed by UnitedHealth Group or its subsidiaries.

12. At issue in this action are the services that Plaintiffs and putative class members provided for patients whose coverage and level of care benefits were determined by UBH between 2011 and January 31, 2019. UBH used proprietary “Level of Care Guidelines” (“LOCGs”) and “Coverage Determinations Guidelines” (“CDGs”) (collectively, “Guidelines”) to evaluate and determine the medical necessity of coverage. The Guidelines were found by this Court to be unlawful in *Wit.*

13. Wit held that UBH breached its Employee Income Security Act of 1974 (“ERISA”) mandated fiduciary duties by basing coverage determinations and level of care decisions on its own profit motives rather than on generally accepted, clinical standards of medical necessity. Although the findings were limited to ERISA plans as that was the issue before the Court, the Court’s holdings in no way depend upon the plans being ERISA plans as the Guidelines were applied with equal injustice to both ERISA and non-ERISA plans.

14. While *Wit* seeks to address the substantial harm caused to patients who were able to pay the cost of uncovered care, that decision does nothing to redress the substantial harm caused to healthcare providers who provided medically necessary care without recompense. The Plaintiffs and Plaintiff Class in this action seek redress in the form of reprocessing for what is likely billions of dollars in wrongfully denied claims. All the while, UBH, UnitedHealth Group and its subsidiaries

1 profited and pocketed premiums while those actually seeking help, often at some of the lowest,  
2 most desperate times of their life, were denied it by those tasked with ensuring their insureds  
3 received medically necessary care.

4       15. As a California Corporation, UBH has a legal duty to act legally, ethically, and with  
5 regard for the public's interest under Cal. Civ. Code §§17200 *et seq.* Through its practice of  
6 applying profit-oriented Guidelines to deny care that was medically necessary, and by applying  
7 those Guidelines specifically to behavioral health treatment patients and providers, UBH breached  
8 these legal duties.

9       16. Plaintiffs and the Plaintiff Class entered into implied contracts with UBH to provide  
10 medically necessary care in exchange for UBH's promise to pay for medically necessary care.  
11 Plaintiffs and the Plaintiff Class performed their duties under these implied contracts while UBH  
12 breached theirs by creating and applying illegal Guidelines. UBH's Guidelines are bad-faith,  
13 tactical policies used to increase shareholder value at the cost of human lives.

14       17. As a condition of providing treatment, Plaintiffs sought and obtained representations  
15 from UBH that their insureds had active coverage for medically necessary services. UBH made  
16 such representations to Plaintiffs while hiding their policies and procedures that applied illegal  
17 Guidelines used to deny coverage. As a direct result of the application of illegal Guidelines and the  
18 following claim denials, Plaintiffs were made to bear the full cost of care they provided to UBH's  
19 insureds under generally accepted standards of medical necessity.

20       18. When patients whose benefits UBH administered entered treatment, they executed  
21 powers of attorney and/or assignments of benefits and financial responsibility agreements to enable  
22 Plaintiffs and the Plaintiff Class to seek payment directly from UBH for treatment services. UBH  
23 is aware that this is a standard practice in healthcare and that such contracts exist for every licensed  
24 healthcare provider. Despite this knowledge, UBH consistently refused to acknowledge Plaintiffs'  
25 and the Plaintiff Classes' right to seek payment for services they provided. Plaintiffs suffered  
26 irrevocable harm because they bore all of the expense of improperly denied claims. Similarly, UBH  
27 interfered with the prospective economic gain that, but for UBH's illegal tactics, Plaintiffs and the  
28

1 Plaintiff Class could reasonably expect to obtain from providing medically necessary services to  
2 patients covered under UBH plans.

3       19. Plaintiffs and all those similarly situated bring this action to achieve redress for the  
4 harm they suffered as a result of Defendant's illegal practices. Plaintiffs seek equitable relief in the  
5 form of a third-party neutral, at Defendant's expense, to reprocess denied claims under appropriate,  
6 industry accepted guidelines and punitive damages in an amount to be proven at trial.

## BACKGROUND

8       20. The causes of action in this case stem from the proliferation of mental health and  
9 addiction that is devastating the United States. The treatment that Plaintiffs and the Plaintiff Class  
10 provide are one of the few remedies that have been shown effective against this epidemic’s spread.  
11 Despite UBH’s full knowledge of these facts, it chose to deny coverage through illegal Guidelines  
12 for life-saving, medically necessary treatment. It is generally accepted in the industry that the  
13 ASAM criteria are the standard as to the care that should be provided to patients seeking MH/SUD  
14 treatment.

#### a. The ASAM Criteria & Its Background

16        21. The ASAM criteria have become the most widely used and comprehensive set of  
17 guidelines for placement, continued stay and transfer/discharge of patients with addiction and co-  
18 occurring conditions. Over 30 states have mandated use of ASAM criteria.

19        22. The ASAM guidelines outline evidence-based criteria and treatment protocols by  
20 which providers can safely and effectively evaluate and provide care for patients. Addiction  
21 professionals rely on ASAM to make clinical decisions about patient care, but are faced with  
22 opposition and indifference from UBH, who substituted its own LOCGs and CDGSs instead of  
23 ASAM criteria thereby obstructing clinicians' ability to render care pursuant to their own clinical  
24 judgement.

25 | 23. The current ASAM Criteria has six dimensions:

**Dimension 1: Acute Intoxication and/or Withdrawal Potential – Exploring an individual’s past and current experiences of substance use and withdrawal.**

**Dimension 2:** Biomedical Conditions and Complications – Exploring an individual’s health history and current physical condition.

1           **Dimension 3:** Emotional, Behavioral, or Cognitive Conditions and Complications –  
 2           Exploring and individual's thoughts, emotions and mental health issues.

3           **Dimension 4:** Readiness to Change – Exploring and individual's readiness and interest in  
 4           changing.

5           **Dimension 5:** Relapse, Continued Use, or Continued Problem Potential – Exploring an  
 6           individual's unique relationship with relapse or continued use or problems.

7           **Dimension 6:** Recovery/Living Environment – Exploring an individual's recovery or  
 8           living situation, and the surrounding people, places and things.<sup>3</sup>

9           24. Applying these dimensions leads to a determination as to the appropriate ASAM  
 10          level of care. The levels of care are subgroups of facility-based treatments, and compose a  
 11          continuum of care that, when properly rendered, constitute a patient's best chance at successful  
 12          treatment. Medical and clinical professionals employed by Plaintiffs and the Plaintiff Class applied  
 13          ASAM criteria to optimize treatment outcomes and to provide the best care possible. The  
 14          benchmark levels of care for adults are:

<b>Level</b>	<b>Adult Title</b>	<b>Description</b>
.5	Early Intervention	Assessment and education for at risk individuals who do not meet diagnostic criteria for SUD
1	Outpatient Services	Less than 9 hours of service/week for motivational enhancement/strategies
2.1	Intensive Outpatient Services	9 or more hours of service/week to treat multidimensional instability
2.5	Partial Hospitalization Services	20 or more hours service/week for multi-dimensional instability not requiring 24-hour care
3.1	Clinically Managed Low-Intensity Residential Services	24-hour structure with available trained personnel; at least 5 hours of clinical service/week
3.3	Clinically Managed Population-specific High-Intensity Residential Services	24-hour care with trained counselors to stabilize multidimensional imminent danger and prepare for outpatient treatment. Able to tolerate and use full active milieu or therapeutic community

---

27  
 28           <sup>3</sup> ASAM Criteria, 3<sup>rd</sup> Ed. pg. 43 (2013)

1	<b>3.5</b>	Clinically Managed High-Intensity Residential Services	24-hour care with trained counselors to stabilize multidimensional imminent danger and prepare for outpatient treatment. Able to tolerate and use full active milieu or therapeutic community
2			
3			
4	<b>3.7</b>	Medically Monitored Intensive Inpatient Services	24-hour nursing care and daily physician care for severe, unstable problems in Dimensions 1, 2 or 3. Counseling available to engage patient in treatment.
5			
6			
7	<b>4</b>	Medically Managed Intensive Inpatient Services	24-hour nursing care and daily physician care for severe, unstable problems in Dimensions 1, 2 or 3. Counseling available to engage patient in treatment.
8			
9			
10	<b>OTP</b>	Opioid Treatment (1) Program (Level 1)	Daily or several times weekly opioid agonist medication and counseling multidimensional Stability for those with severe Opioid Disorder <sup>4</sup>
11			
12			

13        25. These criteria and levels of care provide an accepted industry standard for  
 14 determining medical necessity and the appropriate care and treatment of the patient. Plaintiffs and  
 15 the Plaintiff Class applied the diagnostic dimensions above to make decisions about clinically  
 16 appropriate care for each patient. Insofar as all claims at issue in this case, UBH chose to apply its  
 17 own Guidelines to deny the coverage for services that were provided pursuant to clinicians'  
 18 judgment. UBH's Guidelines were created based on profit, not clinical necessity.

19        26. Despite the predominance and acceptance of ASAM as the industry standard, UBH  
 20 created opaque, proprietary criteria that bear little resemblance to the ASAM Criteria or any  
 21 evidence-based standards of clinical evaluation. This is because UBH administered benefits based  
 22 primarily on its interest in maximizing profits while ASAM is based on maximizing patient  
 23 recovery.

24  
 25  
 26

---

27

28        <sup>4</sup> ASAM Criteria, 3<sup>rd</sup> Ed. pg. 106 (2013)

1                   **b. UBH's Guidelines**

2                 27. During all times relevant to this action, UBH created and controlled medical  
 3 necessity criteria and authorization guidelines for all insurance and benefits plans it administered.  
 4 UBH did not use medical necessity and authorization guidelines that were based on accepted,  
 5 industry standards, such as those put forward by ASAM.

6                 28. Instead, UBH imposed a proprietary, cost-focused schema where it granted or  
 7 denied pre-authorizations and granted or denied coverage for services that did not require pre-  
 8 authorization ("no-auth services"). In all cases relevant here, UBH issued its final denial of  
 9 coverage for both types only after Plaintiffs and the Plaintiff Class had provided treatment UBH's  
 10 insureds. Plaintiffs and the Plaintiff Class chose to provide services based on their professional,  
 11 clinical judgment and the needs of the patients. Plaintiffs and the Plaintiff Class relied on UBH's  
 12 good faith performance of its stated intent to cover medically necessary MH/SUD benefits. Instead,  
 13 UBH exercised its discretion over LOCGs and CDGs to arbitrarily and capriciously deny payment  
 14 for medically necessary claims to maximize its own profits.

15                   **c. Findings in the *Wit* Decision**

16                 29. In *Wit*, this Court held UBH liable to a class of more than 50,000 insureds on all of  
 17 the ERISA counts asserted against it for breach of fiduciary duty and improper denial of benefits  
 18 under 29 U.S.C. §§ 1132(a)(1)(B), (a)(3)(A), and (a)(3)(B). The Court's findings show that UBH's  
 19 violations were pervasive, brazen, and intentional. UBH was driven by its own financial interests  
 20 rather than those of patients.

21                 30. *Wit* details the generally accepted standards of clinical practice for treatment of  
 22 mental health and substance use disorders, having reviewed numerous clinical sources and  
 23 extensive testimony, summarized as follows:

24                 31. **First**, it is generally accepted that many mental health and substance use disorders  
 25 are long-term and chronic. Although a patient may present with certain immediate needs ("acute"  
 26 or "current symptoms"), often these current acute symptoms are manifestations chronic, underlying  
 27 condition(s). Effective treatment of individuals with mental health and/or substance use disorders

1 requires much more than just the alleviation of the current, acute symptoms. The chronic,  
 2 underlying condition(s) must also be addressed. Many MH/SUD's manifest in chronic, severe  
 3 impairments that are not acute but are nonetheless treatable.

4       **32.**     **Second**, many MH/SUD's involve multiple co-occurring conditions that operate  
 5 synergistically to aggravate each other. Effectively treating an individual disorder requires a  
 6 comprehensive, coordinated approach to all of the co-occurring conditions. For example, and of  
 7 particular importance in the present case, effective treatment of substance use disorders requires  
 8 comprehensive treatment of any co-occurring depressive disorders because that can be the  
 9 underlying cause for the substance use. The inverse also occurs. A depressive disorder can both  
 10 exacerbate and be exacerbated by the co-occurring substance use. Co-occurring medical conditions  
 11 can also aggravate MH/SUD's in such a way that effective patient treatment requires a more  
 12 intensive level of care than might be justified if only the one condition was present.

13       **33.**     Thus, a patient might require residential treatment if, for example, that substance  
 14 abuser suffers from debilitating social anxiety disorders that make it impossible for that patient to  
 15 leave home to seek outpatient care even if, in isolation, that patient's substance use disorder would  
 16 not require residential treatment. The synergy of the two disorders necessitates residential treatment  
 17 for effective, lasting treatment.

18       **34.**     **Third**, effective treatment of patients with MH/SUD's requires placement at the  
 19 appropriate level of care. It would be inappropriate, as occurred in this case, to deny residential  
 20 treatment to plaintiffs and class member's patients where application of ASAM guidelines would  
 21 require residential treatment (primarily ASAM 3.7 to 3.1) simply because that patient is not  
 22 currently suffering from some imminent complication or acute condition of their MH/SUD's.  
 23 Behavioral health professionals generally accept that safety and effectiveness are the primary  
 24 driving factors in determining the appropriate treatment level for any given patient, these  
 25 determinations were made by behavioral health professionals on behalf of Plaintiffs and class  
 26 members. UBH did not care about the safety of the patients or effectiveness of treatment and applied  
 27 illegal guidelines developed for profit, not patients.

28

1       35. **Fourth**, patients with mental health and substance use disorders must receive  
 2 treatment at the appropriate level of intensity. In the present case, this almost always will be for  
 3 patients that clinical necessity dictates residential treatment at ASAM levels 3.7 through 3.1  
 4 depending on the patient. Those who receive treatment at a less-than-clinically-appropriate level of  
 5 care, including no care, face far worse outcomes than those who are treated at the appropriate level  
 6 of care. By contrast, providing a higher level of care where there is a question about the appropriate  
 7 level of care intensity does not result in adverse outcomes. It is generally accepted in the MH/SUD  
 8 field that ambiguity as to the appropriate level of care, given the life or death nature of MH/SUD's,  
 9 dictates erring on the side of caution and placing the patient at the higher level of care.

10       36. **Fifth**, effective treatment must not be limited simply to temporary improvement in  
   11 the patient's level of functioning. Residential treatment, here ASAM 3.7 through 3.1, cannot be  
   12 limited to temporary improvement over "baseline" as effective treatment must also aim to prevent  
   13 relapse or deterioration of the patients' condition(s) and to maintain their level of functioning. This  
   14 can only occur when all factors are considered and not merely currently presenting or resolved acute  
   15 symptoms as in UBH's illegal guidelines.

16       37. **Sixth**, treatment must not be artificially time limited. The appropriate duration of  
   17 treatment must be predicated on the individual needs of the patient. In the present case, this means  
   18 the appropriate duration of residential treatment under ASAM criteria for levels 3.7 through 3.1. It  
   19 is generally accepted that a patient should not be discharged or placed at a lower level before  
   20 treatment has been optimized. Further, treatment should not be terminated or downgraded simply  
   21 because a patient has become unwilling or unable to participate in treatment. Indeed, if a patient  
   22 demonstrates an unwillingness to participate in treatment, this may actually justify an increased  
   23 intensity of treatment rather than the termination of it.

24       38. **Seventh**, there exist significant developmental differences between adults, children,  
   25 and adolescents. Children and adolescents are not fully "developed," in the psychiatric sense. Level  
   26 of care intensity decisions require plans to account for the unique needs of children and adolescents  
   27 suffering from MH/SUD's. This, in turn, requires a relaxation of admissions and continued service  
   28 requirements when children and adolescents are involved.

1       39. **Eighth**, MH/SUD assessments must not be limited to less than a full  
 2 multidimensional assessment that accounts for the wide variety of information about the patient,  
 3 which requires behavioral health providers to conduct a holistic, biopsychosocial assessment that  
 4 involves consideration of multiple factors. Thus, it falls below the required standard of care to make  
 5 the level of intensity decision based on only a few enumerated factors focused on acute symptoms  
 6 rather than the entire patient picture.

7       40. The *Wit* plaintiffs are individual members of ERISA plans administered by UBH.  
 8 The plan members brought their action against UBH on their own behalf and in a representative  
 9 capacity under the Employee Retirement Income Security Act of 1974 (“ERISA”) alleging that  
 10 they were improperly denied benefits for treatment of mental health and substance use disorders  
 11 because UBH’s Guidelines did not comply with the terms of their insurance plans and/or state law.

12      41. The Court certified three separate classes:

13      ***Wit Guideline Class***: Any member of a health benefit plan governed by ERISA  
 14 whose request for coverage of residential treatment services for a mental illness or  
 15 substance use disorder was denied by UBH, in whole or in part, between May 22,  
 16 2011 and June 1, 2017, based upon UBH’s Level of Care Guidelines or UBH’s  
 17 Coverage Determination Guidelines. The *Wit Guideline Class* excludes members  
 18 of the *Wit State Mandate Class*.

19      ***Wit State Mandate Class***: Any member of a fully-insured health benefit plan  
 20 governed by both ERISA and the state law of Connecticut, Illinois, Rhode Island,  
 21 or Texas, whose request for coverage of residential treatment services for a  
 22 substance use disorder was denied by UBH, in whole or in part, within the Class  
 23 period, based upon UBH’s Level of Care Guidelines or UBH’s Coverage  
 24 Determination Guidelines, and not upon the level-of-care criteria mandated by the  
 applicable state law. With respect to plans governed by Texas law, the *Wit State  
 Mandate Class* includes only denials of requests for coverage of substance use  
 disorder services that were sought or received in Texas. The Class period for the  
*Wit State Mandate Class* includes denials governed by Texas law that occurred  
 between May 22, 2011 and June 1, 2017, denials governed by Illinois law that  
 occurred between August 18, 2011 and June 1, 2017, denials governed by  
 Connecticut law that occurred between October 1, 2013 and June 1, 2017, and  
 denials governed by Rhode Island law that occurred between July 10, 2015 and  
 June 1, 2017

25      ***Alexander Guideline Class***: Any member of a health benefit plan governed by  
 26 ERISA whose request for coverage of outpatient or intensive outpatient services  
 27 for a mental illness or substance use disorder was denied by UBH, in whole or in  
 28 part, between December 4, 2011 and June 1, 2017, based upon UBH’s Level of Care  
 Guidelines or UBH’s Coverage Determination Guidelines. The *Alexander  
 Guideline Class* excludes any member of a fully insured plan governed by both  
 ERISA and the state law of Connecticut, Illinois, Rhode Island or Texas, whose  
 request for coverage of intensive outpatient treatment or outpatient treatment was

1 related to a substance use disorder, except that the Alexander Guideline Class  
 2 includes members of plans governed by the state law of Texas who were denied  
 coverage of substance use disorder services sought or provided outside of Texas.

3       42. The *Wit* Plaintiffs asserted two types of claims: breach of fiduciary duty and arbitrary  
 4 and capricious denial of benefits.

5       43. The breach of fiduciary duty claim asserted that UBH is an ERISA fiduciary under  
 6 29 U.S.C. § 1104(a) and owed fiduciary duties to the class members, including the duties to  
 7 administer the class members' health benefit plans "solely in the interest of the participants and  
 8 beneficiaries," 29 U.S.C. § 1104(a)(1), "with ... care, skill, prudence, and diligence," 29 U.S.C. §  
 9 1104(a)(1)(B), and "in accordance with the documents and instruments governing the plans," 29  
 10 U.S.C. § 1104(a)(1)(D). This Court found that UBH breached these duties by: 1) developing  
 11 guidelines for making coverage determinations that are far more restrictive than those that are  
 12 generally accepted even though plaintiffs' health insurance plans provide for coverage of treatment  
 13 that is consistent with generally accepted standards of care; and 2) prioritizing cost savings over  
 14 members' interests.

15       44. The denial of benefits claim is based on the theory that UBH improperly adjudicated  
 16 and denied plaintiffs' requests for both inpatient and outpatient coverage by using its overly  
 17 restrictive Guidelines to make coverage determinations. Plaintiffs asserted and the Court ultimately  
 18 held that UBH's reliance on the Guidelines was arbitrary and capricious because: 1) plaintiffs'  
 19 health insurance plans provided for coverage consistent with generally accepted standards of care;  
 20 and 2) as to the *Wit State Mandate Class*, the Class members' health insurance plans were subject  
 21 to state laws that explicitly mandate the use of clinical criteria issued by the American Society of  
 22 Addiction Medicine ("ASAM") or the Texas Department of Insurance ("TDI").

23       45. In the present litigation, Plaintiffs and the Plaintiff Class are behavioral healthcare  
 24 providers with claims that were denied by UBH based on medical necessity during the *Wit* class  
 25 period through January 31, 2019, with such medical necessity coverage determinations made using  
 26 illegal guidelines, the same guidelines found illegal in *Wit*.

27       46. The *Wit* plaintiffs paid providers out-of-pocket for the wrongly denied care,  
 28 suffering personal financial harm. As such, they were the proper Plaintiffs to bring suit. However,

1 their experiences and ability to pay for such treatment are the exception, not the rule. For the claims  
 2 at issue here, far more typical of the experiences of MH/SUD treatment providers nation-wide,  
 3 addicted and mentally-ill patients were not able to pay out-of-pocket for services rendered and the  
 4 financial burden of the wrongfully denied claims fell on the Plaintiff-providers, not the patients or  
 5 their families. Plaintiffs, in this Complaint, are not pursuing any legal claims with respect to any  
 6 specific UBH benefit determinations challenged by individual members of the certified classes in  
 7 *Wit* or *Alexander* above, to the extent that any such claims may overlap. As described *supra*,  
 8 Plaintiffs do not believe that the legal claims overlap.

9       47. All causes of action here directly relate to the *Wit* findings. The Plaintiffs and the  
 10 Plaintiff Class in this litigation provided services based upon representations and promises made to  
 11 them by UBH. After the services were provided, UBH retroactively denied the claims based on  
 12 coverage decisions made using the Guidelines found illegal in *Wit*. In other instances, providers  
 13 would request from UBH authorization to keep a patient at a certain level of care. Routinely, UBH  
 14 would take four days or more before responding to the request with a denial. Meanwhile the  
 15 provider had expended four days of costs and resources to keep a patient at a higher level of care,  
 16 only to find out that UBH would not be paying reimbursement.

17       48. During the ten-day bench trial in *Wit*, the plaintiffs “established that the emphasis  
 18 on cost-cutting that was embedded in [UBH]’s Guideline development process actually tainted the  
 19 process, causing UBH to make decisions about Guidelines based as much or more on its own bottom  
 20 line as on the interests of the plan members, to whom it owes a fiduciary duty... the Court finds, by  
 21 a preponderance of the evidence, that UBH has breached its fiduciary duty by violating its duty of  
 22 loyalty, its duty of due care, and its duty to comply with plan terms by adopting Guidelines that are  
 23 unreasonable and do not reflect generally accepted standards of care.”

24       49. In *Wit*, UBH’s experts “had serious credibility problems...with respect to a  
 25 significant portion of their testimony each of them was evasive – and even deceptive – in their  
 26 answers when confronted with contrary evidence” and the Court discounted their evidence. testified  
 27 as to “generally accepted standards of care related to mental health and substance use disorder  
 28 treatment and whether the [United] Guidelines meet those standards.” Plaintiffs’ experts, on the

1 other hand were found credible by the Court. They testified that the Guidelines did not meet those  
2 standards, which led to the wrongful denial of thousands of claims for addiction and mental health  
3 treatment services.

4       50. *Wit* analyzed two frameworks by which UBH adjudicated claims: Level of Care  
5 Guidelines (“LOCGs”) and Coverage Determination Guidelines (“CDGs”). Those guidelines were  
6 organized according to the acuity of care at issue (*e.g.*, outpatient vs. inpatient treatment). *Wit* found  
7 that UBH’s application of profit-driven LOCGs and CDGs caused claim denials that are at issue in  
8 this litigation.

9       51. Implicitly acknowledging the illegality of its Guidelines, UBH updated its LOCGs  
10 and CDGs on January 3, 2019 when it formally adopted the ASAM Guidelines. The *Wit* court found  
11 that, prior to 2019, UBH’s breached “generally accepted standards for determining the appropriate  
12 levels of care” in favor of a profit-driven benefits administration scheme.

13        52. Distinguishing the Guidelines from the ERISA plans, *Wit* held “that the Guidelines  
14 are not Plan terms” because “they are developed internally by UBH without input from Plan’s  
15 employer sponsors. In addition, no evidence was offered to show that when UBH revises the  
16 Guidelines it complies with the requirements contained in class members’ Plans for amending those  
17 Plans.”

18       53. As the Guidelines are not plan terms, the Court can evaluate them and determine  
19 their applicability in all situations where they were applied by UBH. Here, Plaintiffs seek to hold  
20 UBH liable in tort, contract, statutory, and common law. UBH, not any underlying employer benefit  
21 plan, is the party responsible for breaching its duty to Plaintiffs. UBH is not a traditional ERISA  
22 party, and ERISA was not designed to protect UBH or any other third-party benefits administrator  
23 from liability for bad actions. As the tortfeasor and breaching party, UBH is the proper defendant  
24 in this action.

25        54. The *Wit* court made the following specific findings as to MH/SUD generally  
26 accepted standards of care:

- 27       • It is a generally accepted standard of care that effective treatment requires  
28           treatment of the individual's underlying condition and is not limited to  
          alleviation of the individual's current symptoms;

- It is a generally accepted standard of care that effective treatment requires treatment of co-occurring behavioral health disorders and/or medical conditions in a coordinated manner that considers the interactions of the disorders and conditions and their implications for determining the appropriate level of care;
- It is a generally accepted standard of care that patients should receive treatment for mental health and substance use disorders at the least intensive and restrictive level of care that is safe and effective;
- It is a generally accepted standard of care that when there is ambiguity as to the appropriate level of care, the practitioner should err on the side of caution by placing the patient in a higher level of care;
- It is a generally accepted standard of care that effective treatment of mental health and substance use disorders includes services needed to maintain functioning or prevent deterioration;
- It is a generally accepted standard of care that the appropriate duration of treatment for behavioral health disorders is based on the individual needs of the patient; there is no specific limit on the duration of such treatment;
- It is a generally accepted standard of care that the unique needs of children and adolescents must be taken into account when making level of care decisions involving their treatment for mental health or substance use disorders; and
- It is a generally accepted standard of care that the determination of the appropriate level of care for patients with mental health and/or substance use disorders should be made on the basis of a multidimensional assessment that takes into account a wide variety of information about the patient.

55. UBH's guidelines did not meet generally accepted standards of care. UBH placed excessive emphasis on acute symptoms of withdrawal, without acknowledging the underlying symptoms, causes of the disease of addiction, and generally accepted standards of care identified in ASAM Guidelines and peer-reviewed publications. This Court found, therefore, that UBH had failed in its duty to adjudicate clinical necessity pursuant to the type of legitimate clinical criteria that ASAM deems critical to efficacy.

56. Failures included the failure of United's guidelines to address the effective treatment of co-occurring conditions that may require a patient to be placed in a higher level of care for effective treatment.

57. Further, the *Wit* court held, "The overemphasis on treatment of acute symptoms is found not only in the admission criteria of the challenged Guidelines but also in the continued service and discharge criteria that apply to all levels of care." *Id.* at 26. Inappropriate emphasis on

1 acute symptoms permeated UBH's claims adjudication practices for all levels of addiction  
 2 treatment coverage.

3       58. In *Wit*, the court found that United's guidelines were inconsistent with ASAM  
 4 criteria and held specifically that “[t]he most glaring inconsistency between [United] Guidelines  
 5 and the ASAM Criteria relates to coverage of residential treatment at levels 3.1, 3.3 and 3.5.  
 6 [United] Guidelines simply do not provide criteria for coverage of services at these levels.” *Id.* at  
 7 41.

8       59. The Court ultimately found the UBH had breached its fiduciary duty to the  
 9 individual Plaintiffs and to class members and that UBH was liable to Plaintiffs and class members  
 10 for their denial of benefits claims.

11      60. The present litigation seeks to enforce the *Wit* decision by applying its findings to  
 12 the Plaintiffs and the Plaintiff Class who bore the brunt of the financial harm UBH's illegal actions  
 13 caused. *Wit* itself stands to remedy only a narrow segment of those harmed by UBH's illegal  
 14 LOCGs and CDGs. It does nothing to make whole those who received no treatment when they were  
 15 entitled to it. Nevertheless, equity demands that UBH be accountable to Plaintiffs and others  
 16 similarly situated, who were left financially responsible for billions of dollars in illegally denied  
 17 care.

18      61. Based on the findings and conclusions in *Wit*, plaintiffs have compelling reasons to  
 19 believe that most, if not nearly all, of the denied claims should have been afforded coverage.

20      **d. UBH's Actions Harmed Plaintiffs and the Plaintiff Class**

21      62. Plaintiffs and the Plaintiff Class were irrevocably harmed by UBH's illegal  
 22 adjudication and denial for services that Plaintiffs and the Plaintiff Class provided to UBH's  
 23 insureds based on objective, industry accepted, evidence based standards of care such as ASAM.  
 24 As a direct result of illegal claim adjudications and denials, Plaintiffs and the Plaintiff Class were  
 25 left uncompensated for care they provided. As such, they have been forced to absorb the costs  
 26 billions of dollars' worth of uncompensated, medically necessary care.

27      63. Because they have been harmed by UBH's misconduct, Plaintiffs complain on  
 28 behalf of themselves and all others similarly situated to obtain all relief available under all

1 applicable California and Federal laws. This action seeks to have the denied claims for services  
2 rendered to Defendant's members reprocessed by a neutral, court-appointed third party, at UBH's  
3 expense, and to pay for those days of service that Plaintiffs provided to Defendant's insureds when  
4 there was medical necessity under the appropriate ASAM guidelines.

5       64. It is well established in the Ninth Circuit that “[t]he district court has broad latitude  
6 in fashioning equitable relief when necessary to remedy an established wrong.” *Alaska Center for  
7 the Env’t v. Browner*, 20 F.3d 981, 986 (9th Cir. 1994). An order for the reprocessing of claims is  
8 an equitable remedy, not monetary relief. *See, for example, Wit v. United Behavioral Health*, 317  
9 F.R.D. 106, 132 (N.D. Cal. 2016); *Meidl v. Aetna, Inc.*, 2017 WL 1831916, at \*21 (D. Conn. May  
10 4, 2017). Court supervision and the appointment of Special Master or neutral-third party for the  
11 reprocessing is necessary as the result of UBH’s past behavior. *See, for example, Halderman v.  
12 Pennhurst State Sch. & Hosp.*, 526 F. Supp. 428, 433 (E.D. Pa. 1981) (“The Commonwealth  
13 defendants appear to take the position that they should be able to monitor their own compliance  
14 with the Court’s Orders. This would be somewhat akin to requesting the fox to guard the henhouse.  
15 Unfortunately, as heretofore pointed out, the performance of the defendants in this case underscores  
16 the need for the Special Master”).

## THE PARTIES

18       65. Plaintiff Meridian Treatment Solutions, Inc., a Florida corporation, offers sub-acute  
19 treatment for individuals suffering from mental health, addiction and other co-occurring disorders  
20 in Lauderdale-By-The-Sea, Florida. Meridian provides Mental Health and Substance Use Disorder  
21 (“MH/SUD”) treatment to patients covered under health insurance plans sold or administered by  
22 UBH. Meridian routinely provided services for which it remains unreimbursed as a result of UBH’s  
23 application of illegal Guidelines. Plaintiff was not aware that UBH was using the illegal Guidelines  
24 to make coverage and level of care decisions until the March 5, 2019 decision in *Wit.*

25       66. Plaintiff iRecover Treatment Inc., a California Corporation d/b/a Serenity Palms  
26 Detox, offers sub-acute treatment for individuals suffering from mental health, addiction and other  
27 co-occurring disorders in Palm Desert/Cathedral City, California. Serenity provides MH/SUD  
28 treatment services to patients covered under health insurance plans sold or administered by UBH.

1 Serenity routinely provided services for which it remains uncompensated as a result of UBH's pre-  
2 authorization and clinical necessity guidelines. Serenity was not aware that UBH was using illegal  
3 guidelines to make coverage and level of care decisions until the March 5, 2019 decision in *Wit.*

4       67. Plaintiff Harmony Hollywood, a California Limited Liability Company offers sub-  
5 acute treatment for individuals suffering from mental health, addiction and other co-occurring  
6 disorders in Los Angeles, California. Harmony provides MH/SUD treatment services to patients  
7 covered under health insurance plans sold or administered by UBH. Harmony routinely provided  
8 services for which it remains uncompensated as a result of UBH's pre-authorization and medical  
9 necessity policies. Harmony was not aware that UBH was using illegal guidelines to make coverage  
10 and level of care decisions until the March 5, 2019 decision by the District Court in the Northern  
11 District of California in *Wit v. United Behavioral Health*

12        68. Defendant United Behavioral Health (“UBH”) is a California corporation, with its  
13 principal place of business at 425 Market Street, 14<sup>th</sup> Floor, San Francisco, CA 94105. UBH is a  
14 “provider of mental health<sup>5</sup>” and manages behavioral health services for UnitedHealth Group  
15 members. It operates under the brand name OptumHealth Behavioral Solutions. It is responsible  
16 for drafting and promulgating the internal level of care and coverage determination guidelines  
17 referenced herein. It also adjudicates MH/SUD claims on behalf of UnitedHealth Group.

## JURISDICTION

## **Subject Matter Jurisdiction**

20       69. Plaintiffs Meridian, Serenity, and Harmony are headquartered in diverse  
21 jurisdictions, and the sum of the amounts in controversy exceeds \$5,000,000. This Court has  
22 jurisdiction over this action pursuant to the Class Action Fairness Act (“CAFA”) under 28 USC §§  
23 1332(d) as the amount in controversy exceeds \$5,000,000, the class has more than 100 members,  
24 and the parties are minimally diverse.

<sup>28</sup> <sup>5</sup> 2018 Statement of Information of United Behavioral Health, Document G063267, Filed September 26, 2018.

1                   **Personal Jurisdiction**

2                 70.      The Court has personal jurisdiction over the named Plaintiffs as they have  
3 voluntarily submitted to the jurisdiction of the Court in the filing of the present lawsuit.

4                 71.      The Court has personal jurisdiction over all absent and unnamed putative class  
5 members regardless of whether they have minimum contacts with the forum as Plaintiffs seek a  
6 remedy in equity, not law, and, further, any and all due process protections required will be provided  
7 for during the litigation after class certification. *Phillips Petroleum Co. v. Shutts*, 472 U.S. 797  
8 (1985).

9                 72.      Defendant UBH is a California corporation. The Judicial Council Comment to the  
10 California Code of Civil Procedure section 410.10 recognizes incorporation in the state as a basis  
11 for general, personal jurisdiction.

12                   **VENUE**

13                 73.      Venue is proper in this Court pursuant to 28 U.S.C. § 1391(b)(1) because Defendant  
14 UBH has its principal place of business in this jurisdiction.

15                 74.      Venue is proper in this Court pursuant to 28 U.S.C. § 1391(b)(2) because a  
16 substantial part of the events giving rise to the claims brought herein occurred in this jurisdiction.

17                 75.      Venue is proper in this Court pursuant to 28 U.S.C. § 1391(d) because Defendant is  
18 subject to personal jurisdiction within the state and have sufficient contacts with the Northern  
19 District of California to subject them to personal jurisdiction as if the district were a separate state.

20                 76.      Venue is also proper pursuant to 29 U.S.C. § 1132(e)(2) as many of the breaches  
21 giving rise to the claims brought herein occurred in this district.

22                   **FACTUAL ALLEGATIONS AS TO ALL COUNTS**

23                 77.      In *Wit*, this court found that Defendant's claim processing practices were based on  
24 illegal criteria that caused the improper denial of MH/SUD claims between 2011 and 2019.

25                 78.      UBH developed its Guidelines internally, they are not guidelines common to the  
26 MH/SUD treatment industry.

27                 79.      The Guidelines at issue in the present case are those used by UBH from May 22,  
28 2011 up to and until UBH adopted and began making clinical necessity decisions using the ASAM

1 guidelines after January 31, 2019. UBH, by its own admission, ceased using its Clinical  
 2 Determination Guidelines and Level of Care Guidelines after January 31, 2019.

3       80. UBH's Guidelines did not attempt to independently account for co-occurring mental  
 4 health disorders, risk of relapse, motivation barriers, availability of social support, or whether a  
 5 lower level of care will be equally as effective. Generally accepted industry standards recognize  
 6 that recognition and treatment of each of these omitted factors is critical to successful and effective  
 7 outcomes.

8       81. UBH's Guidelines provided that residential rehabilitation for substance abuse will  
 9 only be covered when the claimant is intoxicated or experiencing or likely to develop withdrawal.

10       82. UBH's Guidelines precluded treatment at the residential rehabilitation level of care  
 11 in the absence of intoxication upon admission without concurrent evidence or likelihood of  
 12 withdrawal. Even with evidence of withdrawal, they required immediate discharge once  
 13 detoxification or withdrawal has passed.

14       83. Further, UBH's guidelines called for denial of residential treatment coverage if  
 15 inconsistent with UBH's Guidelines, requiring a lower level of care if it is "safe" (even if it will not  
 16 be as effective as a higher level of care) and the obligation of patients to prove by "compelling  
 17 evidence that continued treatment in the current level of care is required to prevent acute  
 18 deterioration or exacerbation of the member's current condition."

19       84. UBH's Guidelines called for a denial of outpatient coverage absent the manifestation  
 20 of acute symptoms and/or imminent risk of harm or relapse. In many cases, the presence of pre-  
 21 requisite acute symptoms would qualify patients for hospitalization. In other cases, the UBH CDGs  
 22 included pre-requisites that bore no relation to the appropriate goals of outpatient care.

23       85. ASAM guidelines represent the generally accepted clinical standards of care for  
 24 mental health and addiction treatment. ASAM guidelines indicate that residential treatment  
 25 "withdrawal management," a process potentially far exceeding the duration of detoxification, but  
 26 also discretely account for: "emotional, behavioral, or cognitive conditions and complications,"  
 27 "readiness to change," "relapse, continued use, or continued problem potential," and  
 28 "recovery/living environment." ASAM does not require the presence of either withdrawal or

1 comorbid mental health/medical conditions for admission to residential rehabilitation. ASAM  
2 guidelines and industry standards also indicate that continuing outpatient treatment is necessary in  
3 circumstances far beyond those specified in UBH's LOCGs and CDGs.

4        86. Individuals who are appropriately placed in the clinically managed levels of care  
5 have minimal problems with intoxication or withdrawal (Dimension 1) and few biomedical  
6 complications (Dimension 2), so on-site physician services are not required. Such individuals may  
7 have relatively stable problems in emotional, behavioral, and cognitive conditions (Dimension 3),  
8 meeting the diagnostic criteria of the Diagnostic and Statistical Manual of Mental Disorders (DSM)  
9 of the American Psychiatric Association. Many also have significant limitations in the areas of  
10 readiness to change (Dimension 4), relapse, continued use, or continued problem potential  
11 (Dimension 5), or recovery environment (Dimension 6). Therefore, they need interventions directed  
12 by appropriately trained and credentialed addiction treatment staff. Such individuals also need case  
13 management services to facilitate their reintegration into the larger community.

14           87. Moreover, ASAM calls for continued treatment at the prescribed level of care if any  
15 of the following apply:

The patient is making progress but has not yet achieved the goals articulated in the individualized treatment plan. Continued treatment at the present level of care is assessed as necessary to permit the patient to continue to work toward his or her treatment goals;

-QR-

The patient is not yet making progress but has the capacity to resolve his or her problems. He or she is actively working toward the goals articulated in the individualized treatment plan. Continued treatment at the present level of care is assessed as necessary to permit the patient to continue to work toward his or her treatment goals;

-AND/OR-

24 New problems have been identified that are appropriately treated at the present  
25 level of care. The new problem or priority requires services, the frequency and  
26 intensity of which can only safely be delivered by continued stay in the current level  
of care. The level of care in which the patient is receiving treatment is therefore the  
least intensive level at which the patient's new problems can be addressed  
effectively.

1       88. ASAM further specifies that “[w]hile the duration of treatment varies with the  
 2 severity of an individual’s illness and his or her response to treatment, the length of service in  
 3 clinically managed Level 3 programs tends to be longer than in the more intensive medically  
 4 monitored and medically managed levels of care ... Longer exposure to treatment interventions is  
 5 necessary for certain patients to acquire basic living skills and to master the application of coping  
 6 and recovery skills.”

7       89. Unlike UBH’s Guidelines, ASAM’s Criteria instructively state that “all matrices  
 8 in The ASAM Criteria correlate risk ratings and the types of services and modalities needed and  
 9 indicate the intensity of services where the patient’s needs can best be met.”

10      90. Further, ASAM noted, when an insurer such as UBH develops its own treatment  
 11 level of care guidelines “rather than adhering to nationally validated, reliable, and accepted  
 12 guidelines, it may appear that decision-influencing factors such as cost considerations outweigh  
 13 valid evidence-based authorization requests for medically necessary treatment.”

14      91. UBH applied faulty guidelines to services for all levels of MH/SUD treatment,  
 15 including in making determinations about the medical necessity of out-patient levels of care. UBH  
 16 denied claims for Partial Hospitalization Program (“PHP”) services, Intensive Outpatient services  
 17 (“IOP”), and routine Outpatient services (“OP”) based on profit.

18      92. As such, UBH’s guidelines clearly discriminate against its insureds with  
 19 MH/SUD’s. Unlike the restrictive internal practices and policies that UBH applies to MH/SUD  
 20 claims, UBH applies far less restrictive internal policies and practices to medical claims.

21      93. It is in this environment that Plaintiffs and putative class members provided  
 22 MH/SUD services to UBH’s insureds.

23      94. Plaintiffs own and operate sub-acute Mental Health and Substance Use Disorder  
 24 MH/SUD facilities in Florida and California. Similarly situated Plaintiffs operate MH/SUD  
 25 facilities throughout the country. Between 2011 and 2019, Plaintiffs and class members’ facilities  
 26 and individual providers administered MH/SUD services to millions of patients who were  
 27 beneficiaries of health plans administrated by UBH and/or insured by plans sold and/or  
 28 underwritten by UBH.

1       95. Plaintiffs and the providers they seek to represent, provide, among other services,  
 2 Sub-acute Detoxification Services (“DTX”), Residential Treatment Center services (“RTC”),  
 3 Partial Hospitalization Program Services (“PHP”), Intensive Outpatient Services (“IOP”), and  
 4 Outpatient services (“OP”). The DTX, RTC, PHP, IOP and OP services that Plaintiffs offer are the  
 5 subject of this action.

6       96. Members of the Plaintiff Class offer sub-acute detoxification services (“DTX”)  
 7 which correspond with ASAM level of care 3.7. ASAM 3.7 services are characterized as  
 8 “Medically Monitored Intensive Inpatient Services” in which 24-hour nursing care with physician  
 9 availability, and 16 hour per day clinician availability are necessary to treat and manage symptoms.

10       97. ASAM indicates that level of care 3.7 is appropriate where, pursuant to ASAM  
 11 Dimensions 1-6, patient has some combination of: high but manageable withdrawal risk; requires  
 12 24-hour medical monitoring; has moderately severe cognitive impairment requiring 24 hour  
 13 structured setting; has low interest in treatment and needs motivational strategies; has challenges  
 14 controlling use at less intensive care levels, or has a dangerous home environment. This summary  
 15 of ASAM dimensions is an overview, and not all conditions need to be met to justify placing a  
 16 patient at the 3.7 level of care.

17       98. Members of the Plaintiff Class offer Residential Treatment Care services (“RTC”)  
 18 which correspond with ASAM level of care 3.5. ASAM 3.5 is characterized by 24-hour care with  
 19 trained counselors, and is appropriate where patients have minimal severe withdrawal risk or  
 20 manageable withdrawals, do not require 24-hour medical monitoring, would benefit from a 24-hour  
 21 setting for stabilization, have difficulty with treatment, need skills to prevent continued use; and/or  
 22 have dangerous home environments requiring a 24-hour structured environment. This summary of  
 23 ASAM dimensions is simplified, and not all need to be met to justify placing a patient at the 3.5  
 24 level of care.

25       99. Members of the Plaintiff Class offer Partial Hospitalization Services (“PHP”) which  
 26 correspond with ASAM level of care 2.5, characterized by more than 20 hours a week of services.  
 27 According to ASAM standards, 2.5 level of care is appropriate where there is only moderate risk  
 28 of severe withdrawal; little or no cognitive impairment; poor treatment engagement requiring

1       structured program; likelihood of relapse without near daily monitoring or support; unsupportive  
 2       home environment the risks of which may be mitigated by structure and support. This summary of  
 3       ASAM dimensions is simplified, and not all need to be met to justify placing a patient at the 2.5  
 4       level of care.

5           100. Members of the Plaintiff Class offer Intensive Outpatient Services (“IOP”) that  
 6       correspond with ASAM level of care 2.1. ASAM level of care 2.1 is described as a program with  
 7       more than 9 hours of service per week, which is appropriate where a patient has minimal risk of  
 8       severe withdrawal; no biomedical complications; few cognitive impairments; openness to recovery  
 9       with some need for structure; variable treatment engagement; high likelihood of relapse without  
 10      support; unsupportive home environment which is mitigated by structure and monitoring. This  
 11      summary of ASAM dimensions is simplified, and not all need to be met to justify placing a patient  
 12      at the 2.1 level of care.

13           101. Members of the Plaintiff Class offer Outpatient Services (“OP”) that correspond  
 14      with ASAM level of care 1.0. ASAM level of care 1.0 is described as a program with less than 9  
 15      hours of service per week, which is appropriate where a patient has minimal risk of severe  
 16      withdrawal; no biomedical complications; no unmanageable cognitive impairments; ready for  
 17      recovery but in need of strategies to strengthen readiness; able to maintain abstinence with little  
 18      need for structure; and/or a supportive home environment with which the patient can cope. This  
 19      summary of ASAM dimensions is simplified, and not all need to be met to justify placing a patient  
 20      at the 1.0 level of care.

21           102. Plaintiff and the Plaintiff Class are providers who are either in-network (“INN”) or  
 22      out-of-network (“OON”) providers. The same Guidelines were used for INN and OON provider  
 23      claims.

24           103. INN, or contracting providers, have entered into reimbursement contracts with UBH  
 25      where they agree to accept discounted reimbursement rates as a trade off in exchange for the benefit  
 26      of increased business that results from being part of their “preferred provider organization.” UBH’s  
 27      members and insureds are subject to lower co-payments and deductibles and are accessible through  
 28      directories maintained by UBH. INN provider contracts generally set out the terms of

1 reimbursement but do not address the specifics of medical necessity criteria. The criteria are  
 2 determined by the insurance arrangement or plan. INN patients must be pre-authorized to receive  
 3 care through the same administrative and clinical mechanisms as OON providers.

4       104. Unlike INN providers, OON providers, do not execute reimbursement contracts with  
 5 UBH, and rely on good-faith reimbursement at usual, customary, or reasonable rates (“UCR”) to  
 6 cover the cost of patients’ care in treatment.

7       105. INN and OON providers are subject to identical pre-certification requirements and  
 8 medical necessity standards. UBH’s Utilization Management department administers pre-  
 9 certification and pre-authorizations for both INN and OON plans, and adjudicates post-service  
 10 medical necessity. Pre-authorization protocols and guidelines are independent and external to the  
 11 terms of INN contracts. Without pre-certification, claims will be summarily unpaid regardless of  
 12 network status. UBH’s application of illegal guidelines harmed in and out-of-network providers  
 13 alike.

14       106. Such plans include both ERISA and non-ERISA plans. None of Plaintiffs the  
 15 Plaintiff Class members’ claims herein are subject to ERISA. The claims are for interactions  
 16 specifically between providers and UBH. They are not brought on behalf of the insureds, rather the  
 17 claims as alleged here involve independent duties owed by UBH to the providers outside of ERISA.

18       107. In 2016, approximately 292 Million Americans had some form of health insurance  
 19 with approximately 216 million having a private or “commercial” plan. Of the commercial plans,  
 20 approximately 178 million were employment based and 52 million were purchased directly<sup>6</sup>.  
 21 According to the U.S. Department of Labor, in 2016 there were approximately “2.2 million ERISA-  
 22 covered group health plans covering approximately 135 million people,”<sup>7</sup> or approximately 61% of  
 23 covered workers according to The Henry J. Kaiser Foundation<sup>8</sup>. Therefore, around 39% of all  
 24

---

25  
 26       <sup>6</sup> Barnett, Jessica C., et al., *Health Insurance Coverage in the United States: 2016* (March 2017), United States Census  
 Bureau

27       <sup>7</sup> U.S. Dept. of Labor, *Annual Report to Congress on Self-Insured Group Health Plans* (March 2019)

28       <sup>8</sup> Henry J. Kaiser Family Foundation, 2016 Employer Health Benefits Survey, kff.org (Sep. 14, 2016)

1 employment-based plans, approximately 86 million, and all individual plans, 52 million, a total of  
 2 about 138 million, are non-ERISA based plans. As UBH has possession of every single plan  
 3 relevant to the present litigation, they are in a position to provide the exact percentage of self-funded  
 4 and fully-insured plans they oversee.

5       108. Non-ERISA plans are frequently purchased by individuals from state healthcare  
 6 exchanges or are small group employer plans. Non-ERISA plans are also referred to as “fully  
 7 insured plans” because benefit payments are paid from the assets of the insurer, rather than by the  
 8 employer.

9       109. Of the 216 million people insured by commercial insurance in 2016, 70 million, or  
 10 32%, were covered by plans issued or administered by UnitedHealth Group. It is the largest private  
 11 health insurance company in the United States. In 2016, their revenue exceeded \$186 billion dollars.

12       110. For many services, UBH required that providers obtain “pre-certification” or “pre-  
 13 authorization” as a condition of payment. Between 2011 and 2019, UBH based its pre-certification  
 14 and pre-authorization determinations on the Guidelines. These are a set of clinical criteria that must  
 15 be met for a patient to be eligible for benefits. When UBH decided that level of care criteria were  
 16 not met for a requested service, they denied pre-authorization and refused to pay benefits for  
 17 services, even if they were already being provided.

18       111. Not all policies administered, sold, and/or underwritten by UBH required pre-  
 19 certification or pre-authorization. UBH applied the same Guidelines for these plans in post-service  
 20 reviews.

21       112. Plaintiffs observed all of UBH’s published policies in delivering care to their  
 22 patients. Plaintiffs sought timely pre-certification and pre-authorization when required and timely  
 23 submitted accurate bills for services provided. When pre-certification was not required, Plaintiffs  
 24 rendered services in good faith, believing that UBH would cover medically necessary services.  
 25  
 26

---

27  
 28 https://www.kff.org/report-section/ehbs-2016-section-ten-plan-funding/

1 Plaintiffs medical and clinical staffs made care decisions pursuant to their addiction expertise and  
2 generally accepted industry standards, including those published by ASAM.

3       113. Prior to providing care, Plaintiffs verified that patients had benefits for all services  
4 provided by conducting a “verification of benefits” phone inquiry (“VOB”).

5        114. During the VOB process, Plaintiffs' or their agents asked, and UBH's agents  
6 confirmed, coverage for clinically necessary MH/SUD services.

7       115. Based on information received from the VOBs, Plaintiffs treated UBH's insureds.  
8 Plaintiffs reasonably relied on UBH to provide benefits according to the language and information  
9 obtained in the VOB.

10        116. Plaintiffs and the Plaintiff Class rendered medically necessary services while pre-  
11 authorization decisions were pending, pursuant to their experienced, professional judgement,  
12 regardless of pre-certification requirements, in reliance upon UBH's statements that it would cover  
13 medically necessary MH/SUD services. In all cases relevant here, UBH refused to authorize  
14 services that had already been provided citing lack of medical necessity under their internal  
15 guidelines.

16           117. All post-service claim denials and non-payments were based on UBH's Guidelines  
17 that this Court found illegal and based on UBH's profit over patients motive in *Wit.*

18       118. Plaintiffs and all those similarly situated exhausted all appeals procedures and other  
19 administrative remedies available to dispute non-payment and/or further appeals would have been  
20 futile.

21        119. For the claims at issue, UBH denied pre-authorization requests, denied claims and/or  
22 withheld payment for their own financial gain after the services had already been provided by  
23 Plaintiffs.

## **Factual Allegations Regarding Facility Meridian Treatment Center**

25       120. Plaintiff Meridian Treatment Centers is a MH/SUD provider with its primary place  
26 of business in Fort Lauderdale-by-the-Sea, Florida. Between 2014-2019 Meridian provided sub-  
27 acute MH/SUD services to 49 patients insured or covered under benefits plans administered by  
28 UBH, for which UBH denied payment based on medical necessity.

1           121. Meridian provided PHP (ASAM 2.5), IOP (ASAM 2.1) and OP (ASAM 1.0)  
2 services to UBH members.

3           122. Meridian is licensed by the State of Florida to provide PHP, IOP, and OP services.  
4 Each of the services Meridian provides correspond with the specific ASAM levels of care discussed  
5 above.

6           123. All UBH patients who received treatment from Meridian executed valid assignment  
7 of benefits forms and financial responsibility forms assigning their rights to insurance payment to  
8 Meridian.

9           124. Meridian administered care following clinical best-practices designed and  
10 implemented based on the ASAM criteria by their medical directors, licensed and board-certified  
11 physicians in the State of Florida with significant training, experience and expertise in addiction  
12 and mental health treatment. The medical directors applied ASAM Criteria when diagnosing and  
13 prescribing care. The medical directors supervised Meridian's clinical team to provide  
14 comprehensive, patient-specific, and symptom specific treatment in accordance with ASAM.

15           125. Meridian used an internal billing team to submit and follow up on medical bills  
16 submitted to UBH, to conduct utilization review, and to pursue patient collections from UBH. The  
17 billing team worked closely with the clinical team to ensure that the treatment provided met the  
18 patients' needs. Prior to admitting UBH Patients, Meridian's billing team called UBH to confirm  
19 that each Patient had active coverage for the care to be provided. The billing team requested  
20 information about how services were covered, if pre-certification was required, and what conditions  
21 of pre-certification and coverage were. In general, UBH representatives stated that where there was  
22 coverage, medical necessity was a condition of treatment.

23           126. Meridian relied upon UBH to fulfill assurances made during verifications of benefits  
24 and utilization review processes that clinically necessary care would be covered. But for these  
25 representations and assurances, Meridian would not have provided services.

26           127. Prior to and during UBH's members' admission and treatment, Meridian's  
27 utilization review team worked to obtain pre-certifications from UBH. Precertification is listed in  
28 the VOB as a condition of payment for some services. To obtain pre-certification, a member of

1 Meridian's utilization review team called UBH or one of its designated subsidiaries, requested  
2 coverage, and provided any needed clinical documentation. When UBH disagreed with Meridian's  
3 clinicians about appropriate level of care, or UBH categorically denied pre-certification, Meridian's  
4 utilization review team appealed the decision and requested a peer-to-peer review, in which  
5 clinicians at Meridian would discuss patient's care with clinicians at UBH. If UBH still disagreed  
6 with the clinical team, Meridian would file an appeal and await the decision.

7       128. The final decision often took three or four days, or longer if care was provided over  
8 a weekend. During that lag time, Meridian's treatment team provided appropriate, medically  
9 necessary care for UBH's insureds pursuant to their clinical judgement at their own expense in  
10 expectation of reimbursement. Ultimately, a final decision would be reached several days later. In  
11 all cases at issue here, UBH denied the care. As a result of UBH's coverage denial, the lag time to  
12 obtain that denial, and Meridian's duty to act in its patients' best interests, Meridian provided  
13 unreimbursed days of services.

14        129. In other cases, UBH verbally pre-authorized several days of care in advance only to  
15 later retroactively deny claims it had authorized based on clinical necessity under its Guidelines.

16        130. Medical necessity coverage denials by UBH have left Meridian unpaid for not less  
17 than \$1,739,852 in services. The coverage denials in question were based on criteria contained in  
18 the discredited UBH Guidelines. Although records of these claims are already in the possession of  
19 UBH, due to the protected health information contained within them, Plaintiffs will provide these  
20 records again either under seal or upon the entry of a protective order in this matter.

21           131. Meridian exhausted all available internal appeals mechanisms for all denied claims  
22 with UBH.

## **Factual Allegations Regarding Serenity Palms**

24        132. Plaintiff iRecover Treatment Inc. d.b.a. Serenity Palms (“Serenity”) is a MH/SUD  
25 provider with its primary place of business in Cathedral City, California. Between 2015-2019  
26 Serenity provided sub-acute MH/SUD services to 202 patients insured or covered under benefit  
27 plans administered by UBH for which UBH denied payment based on medical necessity.

1           133. Serenity provided DTX (ASAM 3.7), RTC (ASAM 3.5), PHP (ASAM 2.5), IOP  
 2 (ASAM 2.1), and OP (ASAM 1.0) services to UBH's members.

3           134. Serenity is licensed by the State of California to provide DTX, RTC, PHP, IOP and  
 4 OP services. Each of the services Serenity provides correspond with specific ASAM levels of care  
 5 discussed above. Since Serenity opened, it has provided care to many patients who required pre-  
 6 certification from UBH as a condition of payment and whose care was subject to application of  
 7 UBH's Guidelines.

8           135. All UBH patients who received treatment from Serenity executed valid assignment  
 9 of benefits and financial responsibility form assigning their rights to insurance payment to Serenity.

10          136. Serenity administered care following clinical best-practices designed and  
 11 implemented based on the ASAM criteria by their medical directors, licensed and board-certified  
 12 physicians in the State of California with significant training, experience and expertise in addiction  
 13 and mental health treatment. The medical directors applied ASAM Criteria when diagnosing and  
 14 prescribing care. The medical directors supervised Serenity's clinical team to provide  
 15 comprehensive, patient-specific, and symptom specific treatment in accordance with ASAM.

16          137. Serenity employed a third-party billing company as its agent to submit and follow  
 17 up on medical bills submitted to insurance, to conduct utilization review, and to pursue patient  
 18 collections from UBH. The billing team worked closely with the clinical team to ensure that the  
 19 treatment provided met the patients' needs. Prior to admitting UBH patients, Serenity's billing team  
 20 called UBH to confirm that each Patient had active coverage for the care to be provided. The billing  
 21 team requested information about how services were covered, if pre-certification was required, and  
 22 what conditions of pre-certification and coverage were. In general, UBH representatives stated that  
 23 where there was coverage, medical necessity was a condition of treatment.

24          138. Serenity relied upon UBH to fulfill assurances made during verifications of benefits  
 25 and utilization review processes that medically necessary care would be covered. But for these  
 26 representations and assurances, Serenity would not have provided services.

27          139. Prior to and during UBH's patients' admission and treatment, Serenity's utilization  
 28 review team worked to obtain pre-certifications from UBH. Precertification is listed in the VOB as

1 a condition of payment for some services. To obtain pre-certification, a member of Serenity's  
 2 utilization review team called UBH, requested coverage, and provided any needed clinical  
 3 documentation. When UBH disagreed with Serenity's clinicians about appropriate level of care, or  
 4 denied pre-certification under UBH Guidelines, Serenity's utilization review team appealed the  
 5 decision and requested a peer-to-peer review, in which clinicians at Serenity would discuss the  
 6 patient's care with staff clinicians at UBH. If UBH still denied the request, Serenity would file an  
 7 appeal and await the decision.

8       140. The final decision from UBH often took three or four days, or longer if care was  
 9 provided over a weekend. During that lag time, Serenity's treatment team provided medically  
 10 necessary care for UBH's insureds pursuant to their clinical responsibilities, professional judgment,  
 11 and ASAM criteria. Ultimately, a decision would be reached several days later by UBH. In all cases  
 12 at issue here, UBH denied coverage. As a result of the coverage denial, the lag time to obtain that  
 13 denial, and Serenity's duty to act in its patients' best interests, Serenity was harmed by being unpaid  
 14 for several days of treatment per patient.

15       141. In other cases, UBH verbally pre-authorized several days of care in advance only to  
 16 later retroactively deny claims it had authorized based on medical necessity under its Guidelines.

17       142. As a result of UBH's coverage denials, the lag time to obtain the eventual denial,  
 18 and Serenity's duty to act in its patients' best interests, Serenity provided unpaid days of services.  
 19 Over the relevant time period, Serenity received no payment for services totaling not less than  
 20 **\$627,795.**

21       143. In all claims relevant to this action, Serenity is still unpaid for these days of services.  
 22 The coverage denials in question were based on criteria that *Wit* explained were illegal. Although  
 23 records of these claims are already in the possession of UBH, due to the protected health  
 24 information contained within them, Plaintiffs will provide these records again either under seal or  
 25 upon the entry of a protective order in this matter.

26       144. Serenity, or its agents, exhausted all available internal appeals mechanisms for all  
 27 denied claims with UBH.

## **Factual Allegations Regarding Plaintiff Harmony Hollywood**

145. Plaintiff Harmony Hollywood is a MH/SUD provider with its primary place of business in Los Angeles, California. Between 2012-2019, Harmony provided sub-acute MH/SUD services to 92 patients insured or covered under benefit plans administered by UBH for which UBH denied payment based on medical necessity.

146. Harmony provided DTX (ASAM 3.7), RTC (ASAM 3.5), PHP (ASAM 2.5), IOP (ASAM 2.1) and OP (ASAM 1.0) services to UBH's insureds.

147. Harmony has been treating behavioral health patients and UBH members since 2012. Harmony is licensed by the State of California to provide DTX, RTC, PHP, IOP and OP services. Each of the services Harmony provides correspond with specific ASAM levels of care discussed above. The 92 patients referenced above required pre-certification from UBH as a condition of payment and whose care was subject to application of UBH's Guidelines.

148. All UBH patients who received treatment from Harmony executed valid assignment of benefits and financial responsibility forms assigning their rights to insurance payment to Harmony.

149. Harmony administered care following clinical best-practices designed and implemented based on the ASAM criteria by their medical directors, licensed and board-certified physicians in the State of California with significant training, experience and expertise in addiction and mental health treatment. The medical directors applied ASAM Criteria when diagnosing and prescribing care. The medical directors supervised Harmony's clinical team to provide comprehensive, patient-specific, and symptom specific treatment in accordance with ASAM.

150. Harmony employed a third-party billing company as its agent to submit and follow up on medical bills submitted to UBH and to conduct Utilization Review. Prior to admitting UBH's insureds, Harmony's billing team called UBH to confirm that each patient had active coverage for the care to be provided. The billing team requested information about how services were covered, if pre-certification was required, and what conditions of pre-certification and coverage were. For the claims at issue, in general, UBH representatives stated that where there was coverage, medical necessity was a condition of treatment.

1       151. Harmony relied upon UBH to fulfill assurances made during VOBs and utilization  
 2 review processes that medically necessary care would be covered. But for these representations  
 3 and assurances, Harmony would not have provided services.

4       152. Prior to and during UBH patients' admission and treatment, a utilization review team  
 5 worked to obtain pre-certifications from UBH. Precertification is listed in the VOB as a condition  
 6 of payment for some services. To obtain pre-certification, a member of the utilization review team  
 7 called UBH or one of its alter-egos, requested coverage, and provided any needed clinical  
 8 documentation. When UBH disagreed with Harmony's clinicians about clinical necessity and/or  
 9 the appropriate level of care, or UBH denied pre-certification, the UR team appealed the decision  
 10 and requested a peer-to-peer review with clinicians at UBH. If UBH still denied coverage, Harmony  
 11 would file an appeal and await the decision.

12       153. The final decision often took three or four days, or longer if care was provided over  
 13 a weekend. During that lag time, Harmony's treatment team provided care for UBH's insureds  
 14 pursuant to their clinical responsibilities, professional judgment, and ASAM criteria. Ultimately, a  
 15 final decision would be reached several days later. In all cases at issue here, UBH denied coverage.  
 16 As a result of UBH's coverage denial, the lag time to obtain that denial, and Harmony's duty to act  
 17 in its patients' best interests, Harmony was harmed by being unpaid for several days of treatment  
 18 per patient.

19       154. In other cases, UBH verbally pre-authorized several days of care in advance only to  
 20 later retroactively deny claims it had authorized based on medical necessity under its Guidelines.

21       155. UBH denied claims from Harmony totaling not less than **\$2,516,303**. The coverage  
 22 denials in question were based on criteria that *Wit* decision found illegal. Although records of these  
 23 claims are already in the possession of UBH, due to the protected health information contained  
 24 within them, Plaintiffs will provide these records again either under seal or upon the entry of a  
 25 protective order in this matter.

26       156. Harmony, or its agents, exhausted all available internal appeals mechanisms for all  
 27 denied claims with UBH.

## **CLASS ACTION ALLEGATIONS**

2       157. Plaintiffs bring this action as a class action on their own behalf and on behalf of all  
3 other persons similarly situated as members of the proposed subclasses and seek to certify and  
4 maintain it as a class action under Rules 23(a); (b)(1) and/or (b)(2); and/or (b)(3) of the Federal  
5 Rules of Civil Procedure, subject to amendment and additional discovery as follows:

## Class Definitions

**Putative Class:** All behavioral healthcare providers who, between May 22, 2011 and January 31, 2019 were denied payment and/or reimbursement on claims by UBH for behavioral healthcare services; where such denials were based on the application UBH's Level of Care Guidelines and/or UBH's Coverage Determination Guidelines; and where such claims remain unpaid.

**Size of Class.** The members of the class defined above are so numerous that joinder of all members is impracticable. The precise number of members in the class is known only to UBH and Plaintiffs reasonably believe that the class number exceeds 10,000.

**Class Representatives.** Named Plaintiffs, Meridian Treatment Centers, Serenity Palms, and Harmony Hollywood each provided MH/SUD services subject to the same UBH Guidelines as in *Wit*. Each Named Plaintiff engaged in industry standard practices in each phase of administering treatment, billing, and following up on claims. Each Named Plaintiff billed for services according to standard, uniform, medical coding. Each named plaintiff was uncompensated for claims based on illegal decision-making guidelines. Each named plaintiff is entitled to relief in the form of claims reprocessing.

#### Excluded from the Class are:

- i. Defendants, including any entity or division in which Defendants have a controlling interest, along with their legal representative, employees, officers, directors, assigns, heirs, successors, and wholly or partly owned subsidiaries or affiliates;
  - ii. The Judge to whom this case is assigned, the Judge's staff, and the Judge's immediate family;
  - iii. Any class counsel or their immediate family members; and
  - iv. All governmental entities.

24       158. Plaintiffs reserve the right to amend the Class definition if discovery and further  
25 investigation reveal that any Class should be expanded, divided into additional subclasses, or  
26 modified in any other way.

## Numerosity and Ascertainability

159. This action meets the numerosity requirement of Fed. R. Civ. P. 23(a)(1), given that the number of impacted providers are reasonably believed by the Plaintiffs to exceed ten thousand making individual joinder of class members' respective claims impracticable. While the exact number of class members is not yet known, a precise number can be ascertained from UBH's records for denied MH/SUD claims made using illegal guidelines from 2011-2019.

160. The resolution of the claims of the class members in a single action will provide substantial benefits to all parties and the Court. It is expected that the class members will number at least in the tens of thousands.

161. Finally, Class members can be notified of the pendency of this action by Court-approved notice methods.

## Typicality

162. Pursuant to Federal Rules of Civil Procedure 23(a)(3), Plaintiffs' claims are typical of the claims of class members and arise from the same course of conduct by Defendants. Plaintiffs' persons and real property, like all Class Members, have been damaged by UBH's misconduct in that they have incurred damages and losses related to the claims wrongfully denied by UBH after services had already been rendered through the use of illegal Guidelines.

163. Furthermore, the factual basis of Defendants' actions and misconduct are common to all Class Members and represent a common thread of misconduct resulting in common injury to all Class Members. The relief Plaintiffs seek is typical of the relief sought for absent Class Members.

## Adequacy of Representation

164. Plaintiffs will serve as fair and adequate class representatives as their interests, as well as the interests of their counsel, do not conflict with the interest of other members of the class they seek to represent.

165. Further, Plaintiffs have retained counsel competent and well experienced in class action, multi-district litigation, mass tort, insurance, pharmaceutical and environmental tort litigation.

166. Plaintiffs and their counsel are committed to vigorously prosecuting this action on behalf of the Class and have the financial resources to do so. Neither the Plaintiffs nor their counsel have interests adverse to the Class.

### Predominance of Common Issues

167. There are numerous questions of law and fact common to Plaintiffs and Class Members that predominate over any question affecting only individual Class Members, making it appropriate to bring this action under Rule 23(b)(3). The answers to these common questions will advance resolution of the litigation as to all Class Members. Common legal and factual issues include:

- a. Whether UBH engaged in verifications of benefits (VOB) conversations with a provider prior to the insured receiving treatment.
  - b. What level of treatment UBH authorized in VOB conversations.
  - c. Whether UBH authorized treatment in utilization review and UCR conversations.
  - d. What level of treatment was provided to the member.
  - e. What payments were made to providers.
  - f. Whether partial payments were made based on a lower level of care than was received by the member.
  - g. What guidelines UBH used in determining MH/SUD benefits.
  - h. What guidelines UBH used in determining MH/SUD coverage.
  - i. What guidelines UBH used in determining “Level of Care.”
  - j. Whether such guidelines applied appropriate standards.
  - k. Whether such guidelines provided appropriate care for members.
  - l. Whether UBH intentionally delayed in processing claims.
  - m. Whether UBH intentionally delayed in denying claims.
  - n. Whether UBH delayed level of care decisions knowing that its members would continue to receive care until such decision was made.
  - o. Whether UBH retroactively denied authorizations, knowing that its members had already received care, to save from paying benefits expenses.
  - p. Whether UBH is liable to Plaintiffs and the Class for their actions.

- q. Whether UBH is required to reprocess all MH/SUD denials made under the illegal Guidelines via a Special Master or neutral third-party.

### Superiority

168. The class action mechanism is superior to any other available means of the fair and efficient adjudication of this case. Given the great number of providers across the nation, it is impracticable for Plaintiffs and the Class to individually litigate their respective claims due to the risk of inconsistent or contradictory judgments, generating increased delays and expense, and wasting judicial resources. No unusual difficulties are likely to be encountered in the management of this class action. Therefore, the class action mechanism presents considerably less management challenges and provides the efficiency of a single adjudication under the comprehensive oversight of a single court.

## **CAUSES OF ACTION**

169. Plaintiffs do not bring a cause of action under ERISA as the claims do not arise under and are not preempted by ERISA. A large percentage of the claims which underlie this law suit do not involve ERISA plans. *See ¶ 106 supra.*

170. Second, The U.S. Supreme Court has established a clear test for determining whether a state-law claim is completely preempted by ERISA in *Aetna Health Inc. v. Davila*, 542 U.S. 200 (2004). Under *Davila*, there is no preemption as Plaintiffs have no inherent ability to bring a claim directly against UBH absent an independent cause of action. Additionally, Plaintiffs' causes of action all arise under contracts (written, oral, and/or implied) between Plaintiffs and UBH. For OON providers amounts due under oral and implied contracts do not satisfy the *Davila* test. See *Marin Gen. Hosp. v. Modesto & Empire Traction Co.*, 581 F.3d 941, 948 (9th Cir. 2009).

171. Plaintiffs and the Plaintiff Classes' claims rely on the violation duties that arise independently of an ERISA plan. *See Hansen v. Grp. Health Coop.*, 902 F.3d 1051 (9th Cir. 2018); *Marin Gen. Hosp. v. Modesto & Empire Traction Co.*, 581 F.3d 941 (9th Cir. 2009). As such the claim is not preempted by ERISA. The causes of action asserted below are brought on behalf of providers for duties created extrinsic to the ERISA plans.

## COUNT I:

## **UNFAIR BUSINESS PRACTICES**

172. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

173. Plaintiffs bring Count I under Cal. Civ. Code §§ 17200 *et seq.*, California’s Unfair Competition Law (“UCL”) for damages they sustained from Defendant’s unlawful business practices based on the conduct including that alleged above in paragraphs 1-144 and below in counts II-VIII, and under Cal. Civ. Code § 3294 for punitive damages arising from the acts and based on the conduct including that alleged above in paragraphs 1 through 156 and below in counts II-VIII.

174. As a California corporation, UBH is subject to Cal. Civ. Code §§17200 *et seq.*

175. Under the UCL “unlawful, unfair or fraudulent business act[s] or practice[s]” are prohibited.

176. The UCL’s coverage for “an unlawful business practice” is broad, and embraces “anything that can properly be called a business practice and that at the same time is forbidden by law.” *See Prescott v. Rady Children’s Hosp.-San Diego*, 265 F. Supp. 3d 1090, 1102 (S.D. Cal. 2017) citing *Cel-Tech Commc’ns v. L.A. Cellular Tel. Co.*, 20 Cal.4th 163, 180, 83 Cal.Rptr.2d 548, 973 P.2d 527 (1999).

<sup>177</sup> In *Wit* cited *supra*, the court found United's Guidelines to be illegal.

178. Additionally, UBH violated the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008, 42 U.S.C. § 300gg-26, as UBH's use of illegal Guidelines in making decisions on clinical necessity for MH/SUD were more restrictive than those applied in making decisions about coverage of medical/surgical services. UBH's MH/SUD guidelines used profit, not medical necessity, as their basis.

179. UBH violated the anti-discrimination mandate within the Affordable Care Act at 42 U.S.C. § 300gg-5 by discriminating against Plaintiffs and class members who provided services to patients suffering from MH/SUD disorders based on illegal clinical necessity criteria that was asymmetric to medical/surgical criteria, and that placed profit above patient well-being.

1       180. UBH violated the California Mental Health Parity Act, incorporated into the Knox-  
2 Keene Health Care Service Plan Act at Cal. Health & Safety Code § 1374.72. UBH violated the  
3 Act as many of the claims at issue in the present litigation involve patients that are dual-diagnosis<sup>9</sup>  
4 with the “severe mental illnesses” included in the Act<sup>10</sup>.

5           181. UBH engaged in acts and practices that offend public policy and are immoral,  
6 unethical, oppressive and substantially injurious to consumers as stated in counts I-VIII.

7           182. UBH's unfair acts and practices specified in counts I-VIII enriched UBH and  
8           irrevocably harmed Plaintiffs and class members.

## **COUNT II:**

## **BREACH OF COVENANT OF GOOD FAITH AND FAIR DEALING**

11       183. Plaintiffs re-allege and incorporate the factual allegations above, as though such  
12 allegations were fully stated herein.

13        184. Plaintiffs bring Count II under California common law cause of action for Breach of  
14 the Implied Duty of Good Faith and Fair Dealing to recover restitution and punitive damages  
15 resulting from such breach.

16        185. Between 2011 and 2019 Plaintiffs and all others similarly situated entered into  
17 implied or written contracts with UBH to provide treatment services to their insureds in exchange  
18 for payment of benefits.

186. Plaintiffs, and all others similarly situated, did all, or substantially all of the things  
that the contract required them to do when they provided healthcare for the benefit of UBH's  
insureds.

<sup>24</sup> Dual diagnosis (also referred to as co-occurring disorders) is a term for when a patient experiences a mental illness and a substance use disorder simultaneously. Either disorder—substance use or mental illness—can develop first.

<sup>25</sup> People experiencing a mental health condition may turn to alcohol or other drugs as a form of self-medication to improve the mental health symptoms they experience. However, research shows that alcohol and other drugs worsen the symptoms of mental illnesses. NAMI, Dual-Diagnosis, <https://www.nami.org/learn-more/mental-health-conditions/related-conditions/dual-diagnosis> (last visited Aug 12, 2019).

<sup>26</sup>

<sup>10</sup>(1) Schizophrenia. (2) Schizoaffective disorder. (3) Bipolar disorder (manic-depressive illness). (4) Major depressive disorders. (5) Panic disorder. (6) Obsessive-compulsive disorder. (7) Pervasive developmental disorder or autism. (8) Anorexia nervosa. (9) Bulimia nervosa. Cal. Health & Safety Code § 1374.72.

187. Plaintiffs met all conditions required for UBH's performance.

188. UBH unfairly interfered with Plaintiffs' right to receive the benefits of the contract by illegally denying pre-authorization and/or coverage for clinically necessary services.

189. Plaintiffs and class members were harmed by UBH's conduct because they remain unpaid for medically necessary care they provided.

**COUNT III:**

## **BREACH OF IMPLIED CONTRACT**

190. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

191. Based on the conduct alleged above, including that alleged above in paragraphs 1-156, an implied in fact contracts exist whereby Plaintiff would provide medically necessary substance abuse treatment to UBH's insureds in exchange for reimbursement at Usual, Customary and Reasonable rates. Plaintiffs have performed all conditions, covenants, and promises required to be performed in accordance with the terms and conditions of said contracts/agreements except, if applicable, those that have been excused, waived or are otherwise inapplicable.

192. UBH breached the implied in fact contracts, by way of example and without limitation, engaging in the conduct alleged above.

193. As a proximate and direct result of the UBH's breach of contract, Plaintiffs and class members have suffered, and will continue to suffer in the future, damages subject to proof at the time of trial.

**COUNT IV:**

# **INTENTIONAL MISREPRESENTATION**

194. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

195. Plaintiffs bring Count IV under Cal. Civ. Code, § 1701(1) for Intentional Misrepresentation.

196. UBH represented to Plaintiff that UBH intended to indemnify or otherwise pay for medically necessary healthcare services that Plaintiff provided for the benefit of UBH.

197. UBH did not intend to pay Plaintiffs for the healthcare that Plaintiffs provided.

198. UBH knew that its representation of intent to pay was false when made, and alternatively, UBH made the representation recklessly without regard for the truth.

199. Plaintiffs reasonably relied on UBH's representation of intent to cover services pursuant to fair and reasonable level of care guidelines when Plaintiffs agreed to provide healthcare for UBH's insureds benefit.

200. Plaintiffs, and all others similarly situated, were harmed by UBH's representation because they were never compensated for care that they bore the expense of providing.

201. Plaintiffs and class members substantially relied on UBH's representation of intent to cover services when they agreed to render services for the benefit of UBH and its members.

## COUNT V:

## **NEGLIGENCE MISREPRESENTATION**

202. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

203. Plaintiffs bring Count V under Cal. Civ. Code § 1710 for negligent misrepresentation.

204. As a California corporation defendant United Behavioral Health is subject to Cal. Civ. Code § 1710.

205. The remaining defendants are subject to Cal. Civ. Code § 1710 as other states laws are substantially similar.

206. UBH represented to Plaintiffs and UBH's insureds that UBH truly intended to pay healthcare benefits for healthcare services Plaintiffs provided for UBH's insureds.

207. UBH's representation of its intent pay healthcare benefits was untrue.

208. Plaintiffs reasonably relied on UBH's representation when they agreed to provide healthcare for UBH's insureds.

209. Plaintiffs were harmed by bearing the cost of the care they provided for UBH's insureds, and by bearing the administrative costs of seeking redress.

210. Plaintiffs and class members' reliance on UBH's representation was a substantial factor in causing Plaintiffs' harm.

## COUNT VI:

### CONCEALMENT

211. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

212. Plaintiffs bring Count VI under Cal. Civ. Code 1703(c) for damages resulting from fraudulent Concealment.

213. As a California corporation defendant United Behavioral Health is subject to Cal. Civ. Code § 1703(c).

214. UBH disclosed some facts to Plaintiffs about their intent to cover MH/SUD services but intentionally failed to disclose other facts (that its definition of clinical necessity was more restrictive than ASAM guidelines as more fully described above) that made its disclosure deceptive.

215. Plaintiffs did not know that UBH intended to use profit-based and illegal level of care guidelines to deny payments.

216. UBH intended to deceive Plaintiffs and class members by concealing facts about its actual intent to cover clinically necessary services as understood and generally accepted in the industry.

## **COUNT VII:**

## **INTENTIONAL INTERFERENCE WITH CONTRACTUAL RELATIONS**

217. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

218. Plaintiffs bring Count VII under California common law as a cause of action for Intentional Interference with Contractual Relations such that the reprocessing of Plaintiffs and the Plaintiff Class members' claims necessitate reprocessing by a Special Master or neutral third-party. under appropriate guidelines.

219. A valid contract existed between Plaintiffs and UBH's insureds which guaranteed payment in full for medically necessary care received by UBH's insureds.

220. UBH knew of this contract.

221. UBH intentionally disrupted this contract by refusing to authorize and/or provide coverage for medically necessary services.

222. UBH intentionally used guidelines it created to maximize its own profits by denying coverage for its insureds receiving medically necessary care and treatment.

223. Plaintiffs and class members were irrevocably harmed by the breach in the amount of benefits they were wrongly denied.

**COUNT VIII:**

## **INTENTIONAL INTERFERENCE WITH PROSPECTIVE ECONOMIC RELATIONS**

224. Plaintiffs re-allege and incorporate the factual allegations above, as though such allegations were fully stated herein.

225. Plaintiffs bring Count VIII under California common law as a cause of action for Intentional Interference with Prospective Economic Relations necessitating reprocessing of Plaintiffs and the Plaintiff Classes' denied claims by a Special Master or neutral-third party and for punitive damages resulting from such interference.

226. Plaintiffs, and all others similarly situated, and UBH's insureds and beneficiaries of plans administered by UBH, had an economic relationship that would have resulted in an economic benefit to Plaintiffs.

227. UBH knew of the relationship between Plaintiffs and their patients who were UBH's insureds or indemnified under plans administered by UBH.

228. UBH engaged in wrongful conduct when it refused to authorize and pay for MH/SUD services based on illegal Guidelines after such services were already provided.

229. UBH engaged in wrongful conduct with the intention of disrupting Plaintiffs and the Plaintiff Classes' business model based on payment for medically necessary services rendered. UBH knew with reasonable certainty that its wrongful conduct would interfere with this.

230. UBH did cause the relationship between Plaintiffs and UBH's insureds to be disrupted.

1           231. UBH's conduct was a substantial factor in causing irrevocable economic harm to  
2 Plaintiffs and all those similarly situated.

## PRAYER FOR RELIEF

4 WHEREFORE, the Plaintiffs and the Class demand judgment against Defendant, and each  
5 of them, jointly and severally, and request the following relief from the Court:

- 6           A.     an award certifying the Class;

7           B.     a declaration that UBH acted with negligence, gross negligence, and/or willful,

8           wanton, and careless disregard for the health and safety their insureds;

9           C.     an order requiring that the reprocessing of all claims denied or underpaid on the

10          basis of its illegal guidelines for where Plaintiffs provided treatment to UBH's insureds by a

11          Special Master or neutral third-party at Defendant's expense;

12          D.     an award to Plaintiffs and the Class of injunctive and punitive damages;

13          E.     an order for an award of attorney fees and costs, as provided by law;

14          F.     an award of pre-judgment and post-judgment interest as provided by law; and

15          G.     an order for all such other relief the Court deems just and proper.

## JURY DEMAND

17 Plaintiffs demand a trial by jury of any and all issues in this matter so triable.
